Instructions for Setting Up Your Automated Selling System With The Conversion Pros

Follow the instructions below to get started with the Conversion Pros system.

There are step-by-step videos located in the CP back office under the “TCP System Training” tab located at the top of the page that walks you through how to do everything involved with using Conversion Pros. So, if you have any questions or get stuck look there first!

None of this is as hard as it may seem, all you will be doing is copying and pasting share codes that we provide and editing your personal info and referral links.

Step 1) Watch the Getting Started training video on the Conversion Pros Training page in the back office of IIPA or the CP back office

Step 2) Watch the videos on “forwarding a domain” and posting your “URL on Facebook. Also watch the share code videos for landing pages and autoresponder.

The first two videos are important because number one, I don’t recommend you use the long domain that you get with your conversion pros landing pages for advertising. It’s harder for people to remember long domains.

You can get a .99 cent domain from Godaddy and forward your landing page to that domain and then advertise it.

Go to Godaddy click on “Domains” then click on “Domain Name Search”, scroll down the page a little until you see “.99 .com” names and then pick a name.

Second, if you plan on posting on Facebook you should use a link shortener like tinyurl.

Step 3) Watch the videos on using the pre-built landing pages and share codes.

We make it easy for you to get started promoting the opportunities with IIPA using Conversion Pros by providing pre-built sales funnels.

All you have to do is find the name of the niche/market or program you've joined under the landing pages tab.

You can then find the landing pages and vsl's for the sales funnel. **Copy and paste the share codes for each and then edit them with your personal contact info and referral links and you're done.**

See video on next page:

The screenshot shows the TCP Marketing Suite interface. On the left is a sidebar menu with various tools. The main area features a navigation bar with icons for video, help, and landing page templates. Below this is a table of landing pages with columns for ID, Status, Page Name, Public Link, Share Code, Title, Modified, and Action. Red arrows point to specific elements in the interface.

ID	Status	Page Name	Public Link	Share Code	Title	Modified	Action

155395	Active	cryptoriches4	Get Link	f79438d1	Crypto LP4	2017-12-02 13:33:40	Edit

This is an example for the funnel for cryptoriches/bitcoin. We give you up to 4 options to choose for your landing page, crypto LP, crypto LP2, crypto LP3, crypto LP4 and then your video sale letter (thank you page) Crypto VSL. **(This is the same for all opportunities with the only thing different being the name)**

Step 4) If you want to use a 3rd party autoresponder you already have like Aweber or Getresponse then watch the video on how to connect them to CP. (Optional)

Step 5) Watch the video on setting up your autoresponder messages using share codes and editing text on a page. Again, all you need to do is copy and paste the share code for that program or niche/market.

We've pre-written email messages that you can use to send to your leads after they opt-in to help convert these leads into sale. This is the KEY, the money is in the follow-up. In most cases it will take some people up to 7 times for them to see your message before they decide to join you or buy from you.

And if you want to build your own pages you can watch the video on editing text on a page shown below.

The screenshot shows the 'TCP Training' page with a navigation menu on the left and a main content area. The main content area features a 'FAST START TRAINING' button and a table of training modules. Two red arrows point to specific modules: 'HOW TO START FAST' and 'AUTO-RESPONDER SET UP'.
